Front-end Developer

Web Developer/IT Industry

My journey in web development at Boleh Dicoba Digital has been a blend of innovation and practical solutions, particularly in crafting E-Commerce platforms using Shopify and WordPress. Our team has successfully integrated critical APIs like Sicepat, enabling seamless shipping functionalities, and Xendit for secure payment transactions. These integrations have been pivotal in enhancing user experience and operational efficiency for our clients.

As I navigate the final year of my IT studies at Sekolah Tinggi Teknologi Bandung, my academic insights complement my professional role, where I continue to apply and expand my front-end development skills. With an eye on emerging technologies and a commitment to continuous learning, I aim to contribute to the creation of robust digital infrastructures that drive business growth and customer satisfaction.

Experience

Boleh Dicoba Digital

Web Developer | Oct 2022 – Present (1 years 9 months)

As a Web Developer at PT Boleh Dicoba Digital, I was responsible for creating E-Commerce websites for our clients using Shopify, as well as developing Compro sites using WordPress. My role also involved integrating various APIs to enhance the functionality of these websites.

One of my primary responsibilities was integrating the Sicepat API into our clients' websites to provide accurate shipping costs and generate AWB (Airway Bill) numbers for shipments. This involved developing custom code to seamlessly integrate the API with the website's checkout process.

In addition, I also integrated payment gateways such as Xendit into the E-Commerce websites to provide secure and seamless payment processing for our clients' customers. This required a deep understanding of the APIs and the ability to develop custom code to integrate them with the website's checkout process.

I handled various clients during my time at PT Boleh Dicoba Digital, including Little Joy, Jenny Management, Puri Casablanca, Persis Store, Sidomuncul, Atmos and others. Working closely with these clients, I developed custom websites that met their unique needs and requirements, while ensuring that they were fully functional, secure, and user-friendly.

Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka

Cloud Computing Learning Path Student | Feb 2022 - Jul 2022 (6 months)

Learn the fundamentals of cloud computing to deploy applications, monitor operations, and manage enterprise solutions with these specializations:

- Web, API, & Back-end Basic
- Google Cloud Computing Foundations
- Google Cloud Skills Boost
- Architecting with Google Compute Engine

8Digital Indonesia
